DECLARATION OF VEHICLE SPECIFICATION – 2004 VERSION

COMPLETE THIS FORM AND KEEP THE ORIGINAL

This form must be completed in full by the vehicle owner, who will be deemed to have knowledge of the information submitted. Its purpose is to give HERO rally organisers and scrutineers detailed information about the specification of your vehicle, so that they can check that it is eligible for the event in question.

The same form can be used for all HERO rallies - you do not need to complete a new form for every event you enter. Keep the original, and send a photocopy with your entry form each time. Note that HERO does NOT keep past forms, and you must sign and date the form each time you submit it (so do not sign the original).

If you change your vehicle's specification between events, you may amend the form by crossing out the old information, writing the new data next to it, and signing the amendment, before sending a new copy.

If you don't know the exact specification of your vehicle (e.g. whether a component was modified by a previous owner), write "DON'T KNOW". In this case, the vehicle will be more liable for inspection by the scrutineers.

Items may be checked by an official scrutineer before and at any time during an event. Additionally, this form will be available to other competitors to view on request, if they give due reason.

You must complete the form in ENGLISH and in BLOCK CAPITALS.

Name of vehicle owner: _____	
Vehicle registration number: _____	Country/State of registration: _____
Make of vehicle: _____	Model: _____ Mark or variant: _____
Body type: <input type="checkbox"/> saloon <input type="checkbox"/> drophead/tourer <input type="checkbox"/> open sports <input type="checkbox"/> GT/closed coupé	No of seats: _____
Year of manufacture: _____	Year of introduction of (a) base model: _____ (b) this mark/variant: _____
Chassis number: _____	Engine number: _____
Engine: make: _____	year: _____ capacity (cc): _____
Vehicle dimensions: length (m): _____	width (m): _____ wheelbase (m): _____

1 Chassis or body shell

This vehicle's original chassis or shell, unmodified

Original item, modified as follows (including dates of major modifications):

Improved, modified, or later components as follows (with years in the case of later components):

2 Engine block and capacity

Original block and engine capacity for this vehicle, unmodified

Original block, modified as follows (including dates of major modifications):

Improved, modified, or later components as follows (with years in the case of later components):

If your vehicle has a different type or capacity of engine from that originally fitted, give year in which this specification of engine was first fitted to this model: _____

3 Cylinder head (including valves and valve springs)

Original items for this vehicle, unmodified

Original items, modified as follows (including dates of major modifications):

Improved, modified, or later components as follows (with years in the case of later components):

4 Carburation/Induction System (including air filter, fuel pump, carburettor, injector, manifold)

Original system for this vehicle, unmodified

Original system for this vehicle includes forced induction (state whether turbo or super charged):

Original system for this vehicle includes more than two carburettor chokes (state number):

Original system, modified as follows (including dates of major modifications):

Improved, modified, or later components as follows (with years first fitted to this model, in the case of later components):

5 Other engine components (including crankshaft, camshaft, conrods, pistons, lubrication system)

All components to original factory specification for this model and year (dimensions and materials)

Improved, modified, or later components as follows (with years in the case of later components):

6 Transmission (including gearbox, clutch, differential, prop and drive shafts, axle)

Original items for this vehicle, unmodified

Original items, modified as follows (including dates of major modifications):

Improved, modified, or later components as follows (with years in the case of later components) – state if number of gears increased or overdrive fitted:

If the number of gear speeds have been increase, state year in which this was first done for this model: _____

10 Cooling System (including radiator, fan, water pump, thermostat, oil cooler)

Original system for this vehicle, unmodified

Original system, modified as follows (including dates of major modifications):

Improved, modified, relocated or later components as follows (with years in the case of later components):

7 Braking system

All components to original factory specification for this model and year

Original system, modified as follows (including dates of major modifications):

Improved, modified, or later components as follows (with years in the case of later components):

If the brakes have been upgraded from drum to disc, state year in which this was first done for this model: _____

11 Non-structural bodywork

All components to original factory specification for this model and year (dimensions and materials)

Improved, modified, or later components as follows (with years in the case of later components):

8 Steering

All components to original factory specification for this model and year

Original system, modified as follows (including dates of major modifications):

Improved, modified, or later components as follows (with years in the case of later components):

12 Wheels and tyres

Wheels and tyres to original factory specification for this model and year (dimensions and materials)

Wider, non-original type of wheel (e.g. cast alloy), or later wheels as follows (with years in the case of later items):

Tyre Size (MUST be declared): _____
 NB For UK events, the minimum permissible aspect ratio is 70%

9 Suspension

All components to original specification for this vehicle with original, unstrengthened mounting points

All components to original specification for this vehicle with original, but strengthened mounting points:

Original system, modified as follows (including dates of major modifications):

Improved, modified, or later components as follows (with years in the case of later components):

13 Electrical system

Entire system (including ignition system, charging system and lighting) to original factory specification

Modified ignition system as follows:

Modified charging system as follows:

Improved, modified, or later components to lighting system as follows (with years in the case of later components):

Other significant modifications as follows:

Any other material facts that you would like to declare (use a separate sheet if necessary):

14 Tripmeters

Only original specification odometer/tripmeter fitted

Supplementary odometer fitted: make & model

electronic mechanical No of distance displays _____

DECLARATION (if you want to avoid paperwork do NOT sign the original; sign each copy as you send it)
 I declare the information in this form to be currently correct, to the best of my knowledge.

Signed: _____ Date: _____

This copy of the form is submitted with my entry application for (event): _____
